ACTIVATING WONDERWARE LICENSE USING SCHNEIDER ELECTRIC LICENSE MANAGER

There are 2 types of activation, online and offline activation. Online activation requires the computer to have an active internet connection. Offline activation is used when the computer does not have internet connection.

Note : For the initial installation, open the configurator.

Refresh All Messages		Configure

Click on Schneider Electric License Manager.

Click Test Connection, you will see succeeded message on the Configuration Message.

Click **Configure**, wait until finish.

Then, open Schneider Electric License Manager, log in with your windows account.

You will see your computer name and number of licenses installed there.

On the top right bar, select "Offline Activation" menu, and choose "Request Activation/Deactivation"

	Administrator 👤
	Offline Activation 👻 📿
Request Activation / Deactivation	Save Activation/Deactivation request for License Manager connected to Activation Server ning
Receive Activation / Deactivation	Open Activation/Deactivation response from License Manager connected to Activation Server

It will prompt you to save a file. Save the send-xxxxx.sync file and bring it to another computer with active internet connection.

Go to http://licenseactivation.wonderware.com/

Click on "Choose File" button and select the previous .sync file, then press "Upload File" button

You will receive recv-xxxx.sync file, bring this file back to the license server

On the license server, click on "Offline Activation" menu and choose "Receive Activation/Deactivation", select the recvxxxx.sync file from the website earlier.
